

Elliott Firearms Software

If you are a firearms dealer looking for software that can track serial numbers and conforms to BATF requirements, handle all aspects of your company's point of sales, inventory control and financials, then Elliott Firearms Software is the answer. With this solution, there is no need to maintain a bound book as you receive or sell a firearm. The solution provides the following:

- **Serial Number Tracking That Conforms to BATF Requirements**
- **Point of Sale**
- **Customer Wish List**
- **Barcode Support**
- **Integrated Accounting & Inventory Solution**

Serial Number Tracking Conforms to BATF Requirements

Stop manually updating your Bound Book! Let Elliott Firearms Software track serial numbers for you from receiving to point of sale. It is faster compared with using the traditional Bound Book. You will be able to search serial numbers and respond to BATF inquiries instantly. In recent years, BATF has encouraged firearms dealers to automate their bound book. At any time, you can print a full or partial version of your BATF bound book hard copy from Elliott. The Elliott Firearms Software will make audits by the BATF easier and more efficient.

Elliott is optimized for barcode scanning, which makes the tracking of serial numbers accurate and efficient.

The system can track pending sales items allowing you to better process hand guns that are sold but cannot be picked up until days later.

Elliott allows you to link and organize stored electronic documents, like a scanned form 4473, and retrieve them easily within Elliott. This reduces your paper storage burden.

For Firearms Dealers

No need to manually maintain your BATF Bound Book. The process to answer BATF inquiries is so simple that anyone in your company can look up the record in a matter of seconds.

Point of Sale

Elliott Point of Sale contains a powerful customer relationship management system. You can track customer interest of items. For out of stock items, you can put customers on a wish list. You can use the statistics collected in Point of Sale to make future purchases. Elliott Point of Sale optionally integrates with all major credit card processors.

Customer Wish List

Customers can be notified when you receive an out of stock item. With the press of a button, a customer wish list can be created. When the specific item is received, an e-mail can be sent to you or directly to your customer.

Barcode Support

The system supports barcode label printing. You can also enter the item UPC, either manually or with a scanner, throughout the Elliott system to help with receiving, selling, physical count, or inquiry.

Integrated Accounting & Inventory Solutions

Elliott is a complete accounting and inventory solution. This same software is used by major firearms distributors and importers, but now is available to firearms dealers at a more affordable price.
